

# Mumala CLUB

I want to promote my business through Google; do I need to pay a specialist?

Absolutely not! Download Google My Business, which you can also use from a phone to start promoting your business today. You can post regular updates on it.

A number of Mumala Club members (including Joyce below) have said that Google My Business really helps to boost enquiries.

Posts are short and quick to write. Using images also works really well. Think of it as another social media platform to incorporate in your marketing plan.

You can also post events and clients and customers can add reviews to it.
